OFFICIAL COMMUNITY WHITE DECK

Welcome to RICO MATRIX ($RICO)

The Token That Powers Automated Trading

Network: BNB Smart Chain (BEP-20)

Strict Hard Cap: 100,000,000 $RICO

Contract: 0x484ea3834a2A9734298FeAa077f6728A77E3c533

Every trade executes with mathematical discipline. Every profit burns supply. This is the token that powers automated trading.

WHY TRADING FEELS HARD

The Exhaustion of the Everyday Trader

01 Staring at red candles at 3:00 AM, paralyzed by uncertainty and panic.

02 Constant fear of losing capital while big players control order books.

03 Losing sleep, peace, savings to stress and FOMO.

Trading was supposed to buy your freedom—not consume your peace. It is time to replace human stress with automated discipline.

THE PROBLEMS WE FACE

Why the Old Trading System Fails Everyday Users

01

Giving Up Your Money

Funds sent to third-party platforms risk freezing or loss.

02

Unfair Upfront Fees

Bots charge $100-$500 monthly even with no profits.

03

Speed Disadvantage

Advanced desks use faster automation, leaving retail behind.

Three unspoken truths. One system ready to be replaced.

COMMON SENSE DESIGN

What Does a Truly Fair Platform Look Like?

Fair by design.
Secure by architecture.

01 Zero Custody

Your money never leaves your personal exchange account.

02 Pay-As-You-Profit

Zero fees during drawdowns.

03 Real-Yield Buybacks

25% of all platform gas fees buys back and burns $RICO.

TOTAL SAFETY

100% Control: You Hold the Keys

0%

Zero Risk of Stolen Funds • Zero Platform Custody

NON-CUSTODIAL BY DEFAULT

01 Trade-Only API Connection

Withdrawal permissions are permanently turned off. We cannot withdraw your funds.

02 Safe & Direct

Orders route securely and directly to your exchange account.

03 Your Money Stays with You

Your starting capital and all realized profits stay in your personal balance.

FAIR & HONEST PRICING

We Only Earn When You Win

Platform Fee = 0 during Drawdown

Profit Fee Applied Only on Net Wins

BREAK-EVEN OR LOSS

$0

Market Down/Flat, $0 fee.

PROFIT

Net Win

Profitable Trades, small % deducted from Gas Tank, not core balance.

Aligned incentives. No charge for standing still.

ACTIVE ENGINES • 01

Spot Bot: Calm & Steady Portfolio Growth

01 Zero Liquidation Risk
Buys/sells real spot coins, no liquidation.

02 Smart Dip Buying
Buys dips, sells on momentum return.

03 Continuous Profit Cycles
Converts choppy markets to profits.

ZERO LIQUIDATION RISK
Sleep soundly while smart automation handles the market with discipline.

ACTIVE ENGINES • 02

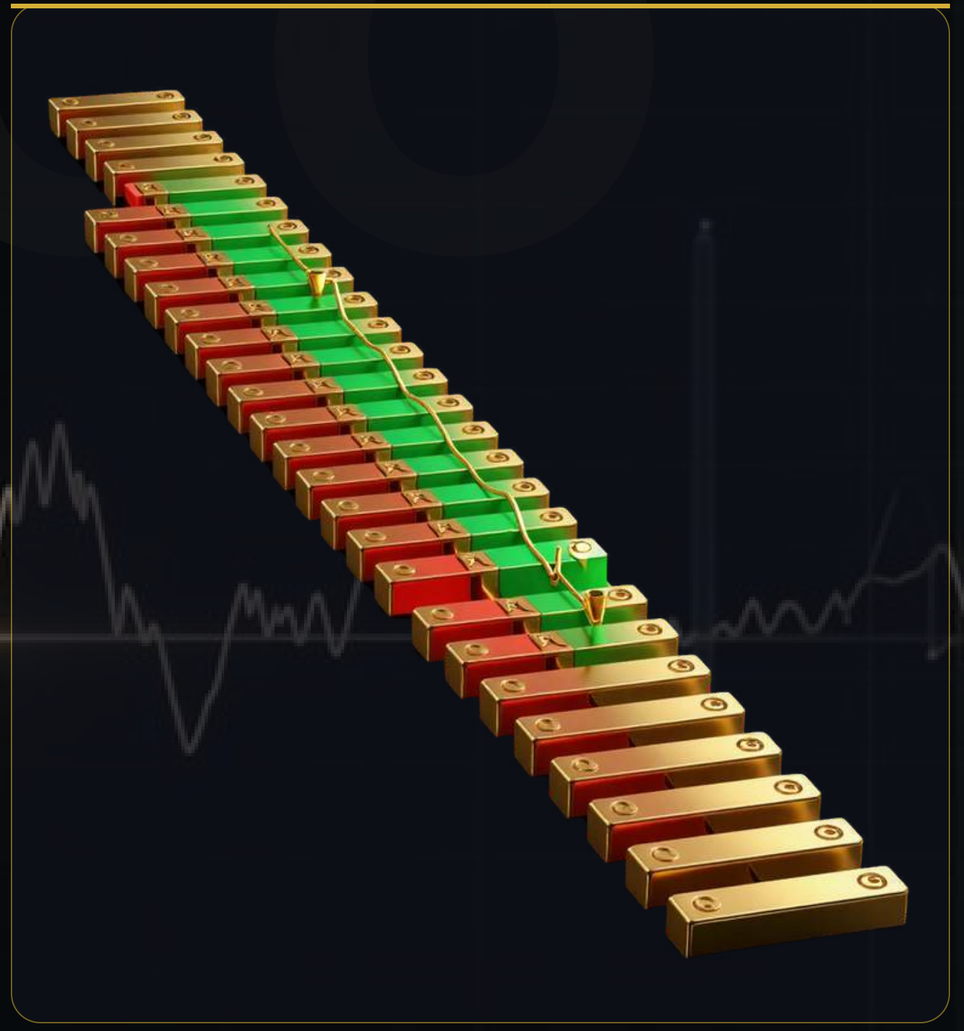
Dynamic DCA: Smarter Dollar-Cost Averaging

01 Smart Entry Points
Uses RSI and trend dips.

02 Lowers Average Cost
Helps break even faster without leverage.

03 Auto Take-Profit
Locks gains automatically on bounce.

Stop guessing the bottom. Let smart math average your entries automatically.



ACTIVE ENGINES • 03

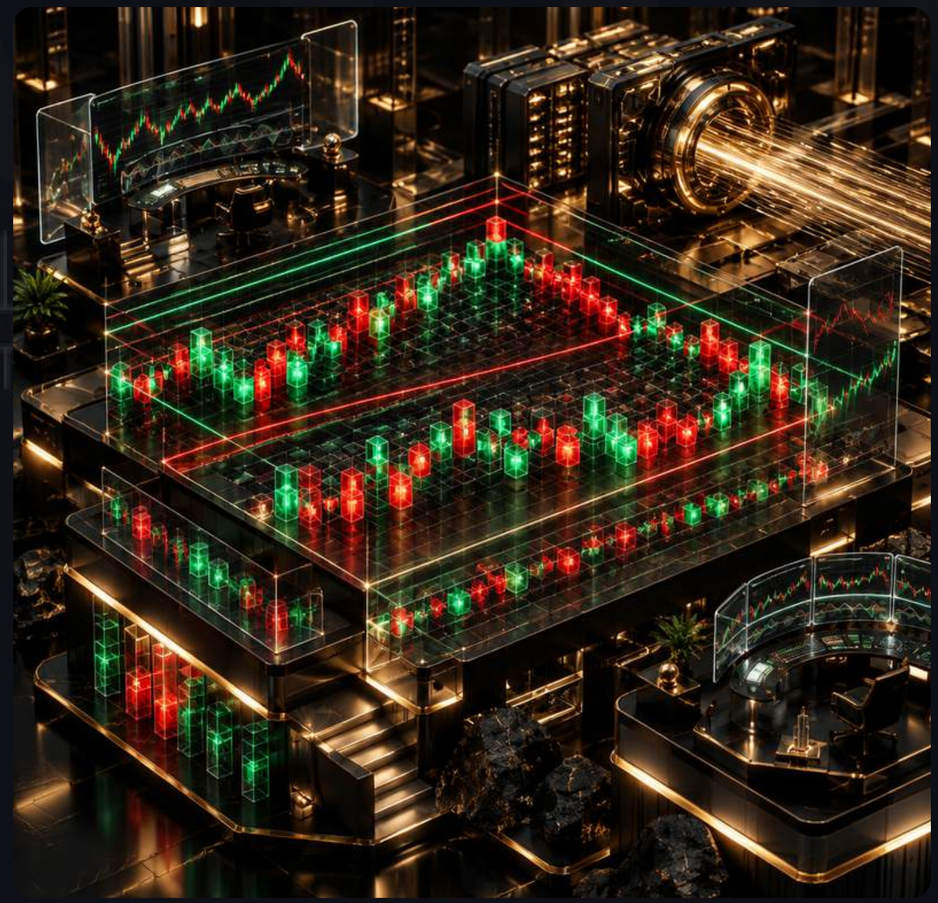
Grid Bot: Making Profits from Market Swings

01 Automated Buy/Sell Grids
Small orders catching quick swings.

02 Built-in Safety Stops
Protects positions below boundaries.

03 Smooth Exchange Connection
Runs without delays.

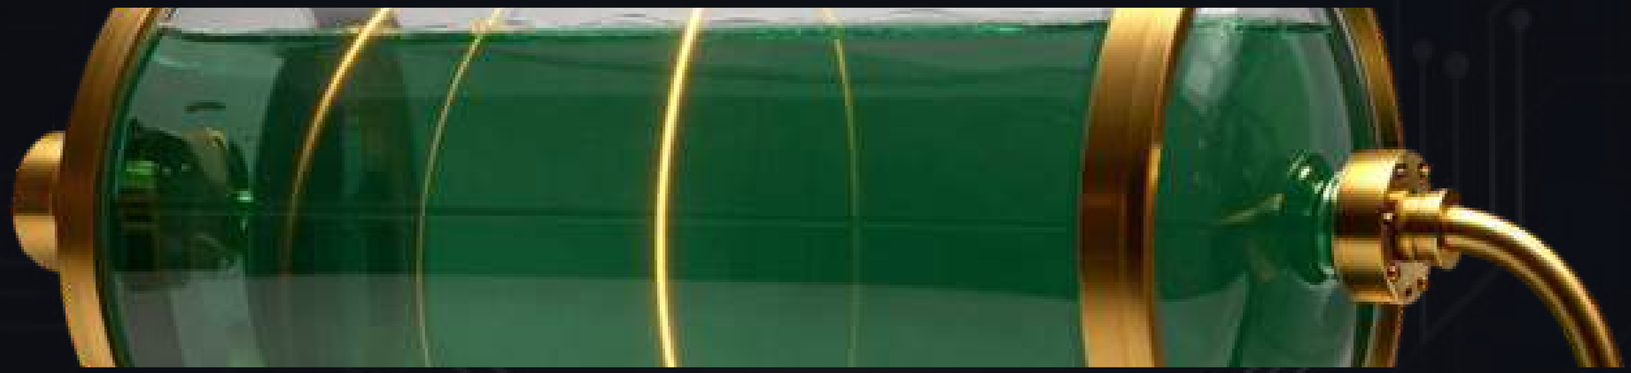
Turns slow and sideways markets into active, round-the-clock profit opportunities.



HOW IT WORKS

The Bridge Connecting Bot Activity to Token Value

USDT | USDC | BNB | $RICO



Supported currencies all auto buy back & burn $RICO.

Every single gas refill—no matter which coin is used—permanently burns $RICO supply.

SIMPLE TIERS

Pick the Package That Fits Your Goals

BASIC

$20 Gas

35% Fee

65% Profit Keep

CLASSIC

$150 Gas

34% Fee

66% Profit Keep

VIP

$1,500 Gas

30% Fee

70% Profit Keep

PRO ELITE

$20,000 Gas

25% Fee

75% Profit Keep

Transparent tiers for all user ~~levels.~~

REAL TOKEN VALUE

Turning Trading Profits into Direct Scarcity

Tokens Burned = (0.25 × Total Gas Deposited) ÷ Current Market Price of $RICO

Safe swaps via PancakeSwap with slippage limits.

Direct incineration to 0x000...dEaD burn address.

25% ROUTED TO BUYBACK & BURN

SCARCITY MODEL • BASIC

When 5,000 Everyday Users Start ($20 Deposit)

Total Gas Deposited

5,000 × $20 = $100,000

25% Buy & Burn Fund

$25,000

25% Buy & Burn Fund

Small community deposits steadily remove tokens forever.

SCARCITY MODEL • CLASSIC

Active Traders in Action ($150 Deposit)

Total Gas Deposited

3,000 × $150 = $450,000

25% Buy & Burn Fund

$112,500

25% Buy & Burn Fund

Active traders generate over $112K buy & burn each cycle.

SCARCITY MODEL • VIP

Dedicated High-Volume Traders ($1,500 Deposit)

Total Gross Inflow

2,500 × $1,500 = $3,750,000

25% Buy & Burn Capital

$937,500

25% Buy & Burn Capital

Nearly $1M in direct buy pressure from VIPs.

SCARCITY MODEL • PRO ELITE

Large Portfolios at Work ($20,000 Deposit)

Total Gross Inflow

500 × $20,000 = $10,000,000

25% Buy & Burn Capital

$2,500,000

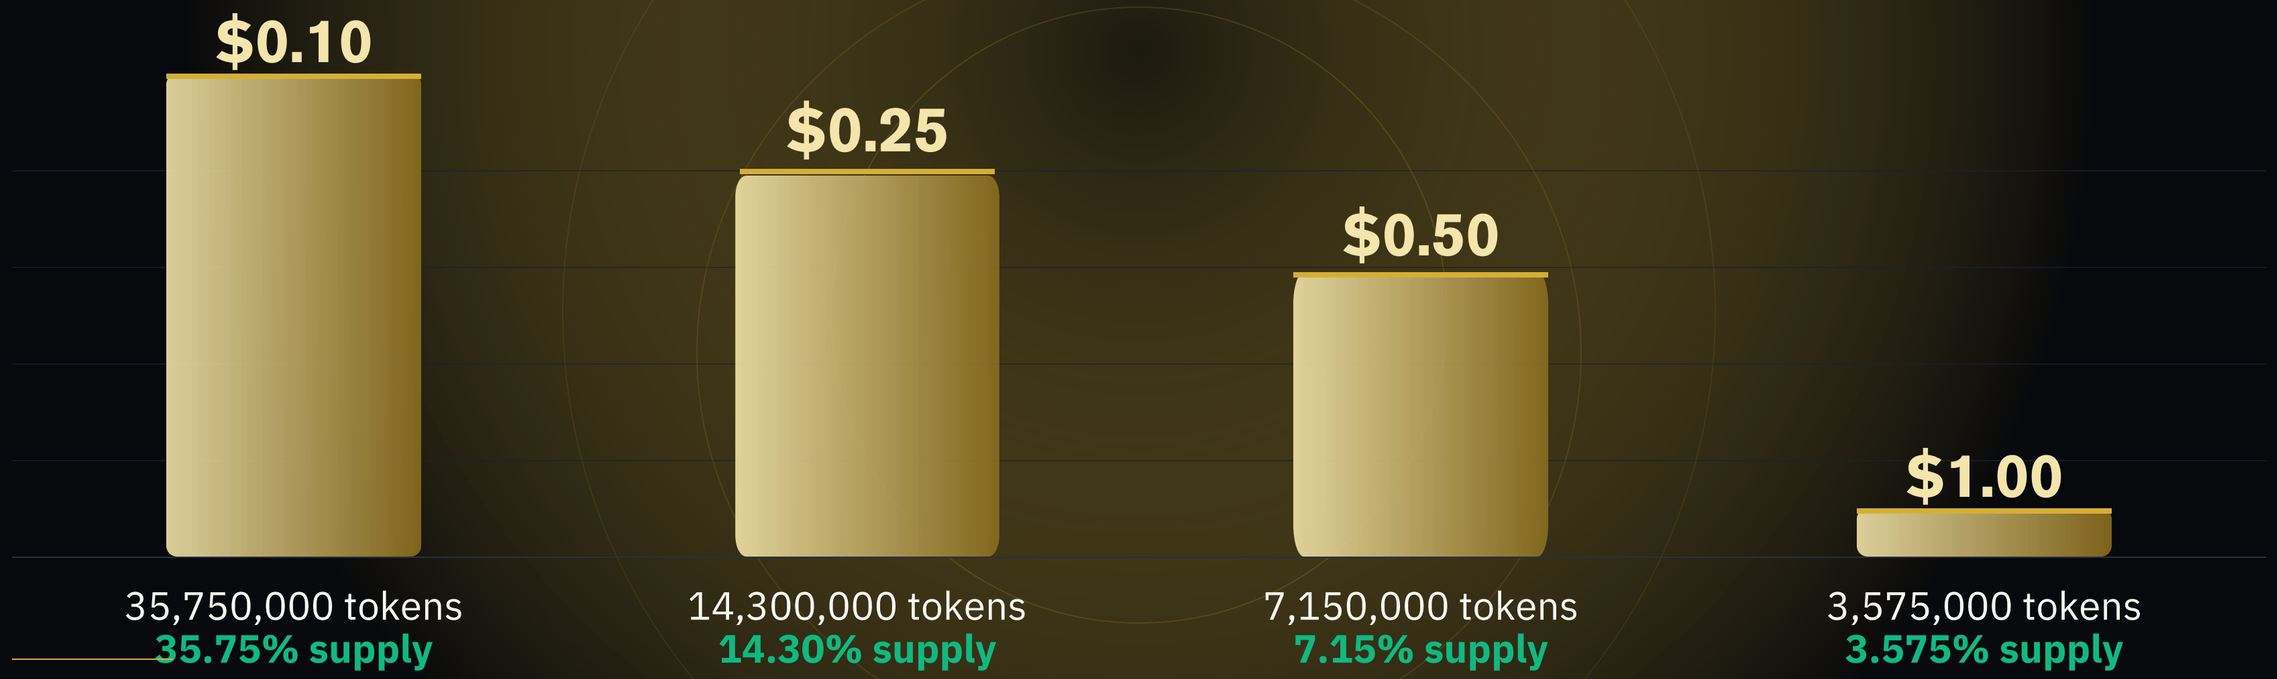
25% Buy & Burn Capital

Large deposits drive massive buybacks on market.

THE COMPOUNDING SQUEEZE

What Happens with 11,000 Active Accounts

Single-Cycle Inflow: $14,300,000 | **Total Buyback Capital: $3,575,000**



Bot profits refill gas, fueling ongoing buy pressure and permanent supply shrink.

EMPOWERMENT THROUGH EDUCATION

Web3 Academy: Turning Beginners into Confident Traders

01
Wallet & Crypto Safety

02
Easy Bot Setup

03
Smart Risk Habits

Helping everyday people understand crypto, DeFi, and automated trading with confidence.

REWARDING LEARNERS

Earn While You Learn with the Community

2,000,000 $RICO

2.0% total supply

Airdrop Rules & Timeline

Community learner rewards program.

SUSTAINABLE REAL REWARDS

Dual-Stream Staking Architecture

Separating native protocol incentives from organic fee revenue eliminates hyperinflation.

Total Staker Yield = Fixed 8M Token Reserve Pool + Real Platform Fee Share

Stream A

(8M Reserve Pool - Bootstrap Emissions)

- Fixed, non-mintable escrow allocation
- Emitted on a determinate decay curve to protect circulating supply
- Self-balances dynamically as Total Value Locked (TVL) surges

Stream B

(Real Protocol Fees - Organic Cash-Flow)

- Funded directly by platform transaction fees and distributed in liquid cash/BNB
- Yield scales naturally with platform adoption and trading volume

Key Safeguards:

- **Zero Dilution:** Hard-capped reserve guarantees no unexpected inflation.
- **Solvent Forever:** Payouts self-balance without risk of pool exhaustion.

REWARD HORIZONS

Loyalty Multipliers & Reward Shares

Longer lock durations grant more reward shares, boosting monthly token and cash distributions.

Vault 1

(1-Year Vault - Baseline Tier)

1.0× Multiplier

| 1 Token = 1 Reward Share

Base proportional allocation from monthly token distributions and fee revenue.

Vault 2

(3-Year Vault - Committed Tier)

2.25× Multiplier

| 1 Token = 2.25 Reward Shares
(+125% Boost)

More than double the reward cut for both token distributions and real cash payouts.

Vault 3

(5-Year Vault - Partner Tier)

4.0× Multiplier

| 1 Token = 4.0 Reward Shares
(+300% Boost)

Maximum priority share, earning quadruple the monthly payout per token committed.

EXECUTION LOGIC:
The smart contract divides each monthly distribution bucket by total active reward shares.
Unlocked positions automatically revert to 1.0× upon expiration.

TOKEN FUNDAMENTALS

Transparent & Unchangeable Token Rules

Token Name:
RICO MATRIX

Ticker:
$RICO

Blockchain:
BNB Smart Chain (BEP-20)

Strict Hard Cap:
100,000,000 $RICO
(Permanently hardcoded)

Token Type:
Deflationary Utility & Platform Fuel

Contract Address:
0x484ea3834a2A9734298FeAa077f6728A77E3c533

Core Rule Box:

The contract has no minting function; total supply can only decrease over time through platform buybacks.

TOKEN ALLOCATION

Clear Distribution of 100,000,000 Tokens

Marketing, Global Education & Partnerships:	25.0% (25M)
Tier-1 Exchange & DEX Liquidity Pool:	20.0% (20M)
Core Engineering & Contributors:	18.0% (18M)
Early Seed Supporters & Presale:	12.0% (12M)
Staking Rewards Pool:	8.0% (8M)
Ecosystem Grants & Expansion:	5.0% (5M)
Community & Learner Airdrop:	2.0% (2M)

REAL COMMITMENT

Built for the Next 10

Anti-Dump Guarantee:

While most crypto founders unlock their tokens in 1 or 2 years, our team is locked for a full decade.

Controlled Releases:

Only 450,000 $RICO per quarter can be released to the core team.

True Alignment:

Proves our long-term focus on stability, transparency, and continuous community building.

MARKET STABILITY

Structured Seed & Presale Unlocks

12.0% of Total Supply

(12,000,000 $RICO)

1

Step 1: The 6-Month Lock –

Seed and presale tokens remain fully locked post-launch, protecting the community from sudden dumps.

2

Step 2: Quarterly 25% Releases –

Released gradually in 4 equal parts every 3 months.

3

Step 3: Predictable Distribution –

Keeps the token healthy, smooth, and liquid on all exchange pairs.

REAL-WORLD USES

6 Core Ways $RICO Works for You

Utility 1

(Gas Discounts):

Pay your bot gas with $RICO to lower platform profit fees.

Utility 2

(Automatic Burns):

25% of all platform gas is permanently removed from circulation.

Utility 3

(Real-Yield Staking):

Lock tokens for 1, 3, or 5 years and earn rewards backed by real revenue.

Utility 4

(Access to Advanced Bots):

Hold and use tokens to unlock powerful multi-bot tools.

Utility 5

(Community Voting):

Help decide future ecosystem tools and project grants.

Utility 6

(Earn-to-Earn Rewards):

Earn tokens as you learn inside the Web3 Academy.

UPCOMING FEATURES

New Automated Tools in Development

Bot 1:
Token Sniper Bot

Fast monitoring to capture new token liquidity launches safely.

Bot 2:
Copy Trading Hub

Follow and copy the moves of proven top traders automatically.

Bot 3:
Front-Running Protection Bot

Shields your decentralized trades from predatory bots and sandwich attacks.

Bot 4:
Grid & DCA Bots

Easy tools to catch sideways ranges and accumulate dips smoothly.

ADVANCED FEATURES

Next-Level Automated Strategy Tools

Tool 1: Price Arbitrage Bot –

Captures price differences for the same coin across different exchanges.

Engineered / In Deployment

Tool 2: Pairs Trading Bot –

Trades pairs of correlated coins to capture profits safely.

Engineered / In Deployment

Tool 3: Market-Making Bot –

Automatically places buy and sell quotes to collect spread fees.

Engineered / In Deployment

Tool 4: AI Market Signals –

Smart algorithms analyzing while movements and order flow to deliver clear trade signals.

Engineered / In Deployment

LAUNCH METRICS

Launch Price & Market Starting Point

Initial Listing Price:
$0.035

Initial Circulating Market Cap:
$500,000

Initial Circulating Supply:
14,285,714 $RICO (~14.29% of cap)

Fully Diluted Value (FDV):
$3,500,000

Strict Hard Cap:
100,000,000 $RICO

Circulating Supply =
Initial Market Cap + Listing Price

= $500,000 + $0.035
≈ 14,285,714 $RICO

VALUE MILESTONES

Early Growth Targets

+100%

Milestone 1 (1x - Listing Baseline):

Target: Price: $0.035 | Market Cap: $500K | FDV: $3.5M

Foundation: PancakeSwap listing, initial liquidity locked.

+500%

Milestone 2 (5x - Initial Growth):

Target: Price: $0.175 | Market Cap: $2.5M | FDV: $17.5M

Catalyst: 20,000 community milestone and deep decentralized liquidity pools.

+1000%

Milestone 3 (10x - Major Exchange Expansion):

Target: Price: $0.350 | Market Cap: $5.0M | FDV: $15.0M

Catalyst: First major centralized exchange listings and full bot rollout.

LONG-TERM VISION

Long-Term Growth Horizons

10%

4

Milestone 4

(30x - $1.00 Milestone):

Target: Price: $1.050 | Market Cap: $15.0M | FDV: $105M

5

Milestone 5

(50x - Global Platform Usage):

Target: Price: $1.750 | Market Cap: $25.0M | FDV: $175M

6

Milestone 6

(100x - Major Crypto Milestone):

Target: Price: $3.500 | Market Cap: $50.0M | FDV: $350M

Perspective Callout:

Even at a 100x valuation ($50M market cap), $RICO remains a healthy mid-cap token compared to top utility projects.

SIMPLE SCARCITY MATH

Why More Active Users Means Fewer Tokens

The Core Dynamics:

Early Stage Acceleration ($0.035 – $0.10):

Dedicated gas fees buy back and burn large absolute quantities of circulating tokens, dramatically reducing liquid supply.

The Core Dynamics:

High-Cap Sustainability ($0.50 – $3.50):

Deep institutional and bot platform volume sustains million-dollar buybacks even as unit prices rise.

The Takeaway:

Continuous gas fees + a fixed 100M supply cap = steady, lasting scarcity.

MAJOR CATALYST

Reaching 20,000+ Members Unlocks Exchanges

The Target: 20,000 Verified Community Members

20,000
VERIFIED COMMUNITY MEMBERS

What Happens at 20,000:

1 Exchange Submissions:

Direct applications to top centralized exchanges.

2 20M Liquidity Deployment:

Unlocking the 20,000,000 $RICO liquidity reserve.

3 Worldwide Access:

Making $RICO simple and easy to trade worldwide.

KEY MESSAGE

Our community is our strength. Every new member brings us closer to top exchange listings.

ROADMAP

Clear Horizons & Milestones

Phase 1: Foundation

(Live): BEP-20 Contract, Core Spot/Futures/DCA Bots, Web3 Academy, 2% Airdrop.

Phase 2: Community & Exchange Listings:

Reach 20K Community, Deploy 20M Liquidity, Apply to Top CEXs.

Phase 3: Expanding Trading Tools:

Sniper Bots, Front-Running Protection, Copy Trading, Staking Vaults v2.

Phase 4: Smart AI & Multi-Chain:

Deep Learning Signals, Multi-Chain Gas Bridges, Ongoing 10-Year Vesting Checkpoints.

SAFETY FIRST

Verified Community Security

Pillar 1: Multi-Signature Treasury

Treasury funds require multiple authorized team signatures for all transactions.

Pillar 2: Zero New Minting

The 100M total supply cap is permanent and can never be inflated.

Pillar 3: Verfiable Burn Address

All burned tokens are sent to 0x000...dEaD and are verfiable on BSCScan.

Pillar 4: Fair Incentives

The platform only earns when you realize net trading profits.

JOIN THE COMMUNITY

Thank You for Believing in the Vision

Three Simple Pillars:

Non-Custodial Safety:
Capital never leaves your personal exchange account.

Aligned Incentives:
Pay only when you realize profit.

Compounding Scarcity:
25% of operational gas is burned on-chain.

Official Portals Box:

Trading Bot Platform:
quantima.app

Token & Utility Gateway:
ricotoken.finance

Blockchain: BNB Smart Chain (BEP-20) - Symbol: SRICO

Trade with precision. Grow with confidence.
The token that powers automated trading.
